

Ernest C. Levister, Jr., M.D. is a qualified medical examiner and an independent medical examiner for the State of California. He practices internal medicine, cardiology, occupational medicine, and toxicology in San Bernardino. Prior to his role as medical attaché to the United States from 1978-79, he practiced internal medicine and cardiology in Virginia, Washington, D.C., Texas, and for the U.S.A. European Command.

Throughout his distinguished career, Levister has held a variety of academic positions. He was a fellow for the American College of Physicians in 1977, and later a fellow for the American College of Preventative Medicine. He has been a member of both the Diplomatic National Board of Medical Examiners and the Diplomatic American Board of Internal Medicine. His academic appointments include his current position as clinical professor of medicine at the University of Irvine, and his previous post as clinical assistant professor of occupational and environmental medicine at the same institution. Prior to his time in California, he was an instructor in the school of engineering at the Tuskegee Institute, a clinical assistant professor of medicine for the George Washington School of Medicine, and an assistant professor of medicine at Eastern Virginia Medical School.

He has published extensively on various medical topics, most recently a chapter in *Science on the witness stand: Evaluating scientific evidence in law, adjudication and policy* titled "Individual medical evaluation and personal risk." Additionally, he has long been a medical columnist for the *Black Voice News*, and served as commissioner for the City of Riverside's Environmental Protection Commission.

Levister has been honored with numerous awards, including the California Medical Association Leadership Award and recognition from the 108th Congress, 2nd session for Congressional Record Proceeding. He was a 1999 recipient of the Dr. Rosemary Schraer Humanitarian Award, and a 2000 recipient of the Black Rose Award from the San Bernardino Black Culture Foundation.

He received his A.B. in chemistry from Lincoln University and his B.S. in chemical engineering from Lafayette College, both in Pennsylvania. Levister was then awarded his M.D. from Howard University, and completed his internship, residencies in radiology, internal medicine, cardiology, and occupational medicine in New Jersey, Philadelphia, Washington D.C. and San Francisco, respectively.
