

**ST. JOHN'S
UNIVERSITY**

Virtual Conference January 16, 2021

Joseph Kerski – Plenary Speaker 11:30 AM EST

Spatial Communications:

*Using Maps and Geotechnologies to Visualize 21st
Century Problems—and To Solve Them.*

Join geographer and educator Joseph Kerski as we explore the world of cloud-based geotechnologies and why these tools, and the spatial data, feeds, and artificial intelligence behind them, are transforming society and enabling problem-solving from local to global scale. Discover how you can use these same tools, data sets, and approaches in your own teaching, learning, and research.

Jeffrey Perkel – Closing Speaker 3:30 PM EST

How to Talk about your Research?

Journal publications are the currency of science. But to attract funding and interest, you'll have to engage with a wider audience. Join *Nature* Technology Editor Jeffrey Perkel as he discusses strategies for communicating your research to the media, funding agencies, and the general public.

Morning Panel Discussions

Interdisciplinary Narrative in Science
Art and Science Narrative
Storytelling and Science
Science in the News

Lunchtime Poster Session

Afternoon Workshops

Poetry in Science
Adventures in Optics at Home
Designing a SENCER Course
PowerTweets
Brain Science
